

Peter Bonis, MD

Assistant Director of the Evidence Based Practice Center (Tufts – NEMC) Deputy Editor / Director of Research (Up-To-Date)

Peter Bonis, MD graduated from Harvard College and New York University School of Medicine and completed post-graduate training in gastroenterology and health services research at the New England Medical Center, Tufts University School of Medicine. He is Director of Research and Deputy Editor of Gastroenterology and a member of the senior management team at UpToDate, a leading content provider of state-of-the-art clinical knowledge systems for clinicians. Dr. Bonis is Assistant Professor of Medicine at Tufts University School of Medicine and Assistant Director of the Tufts New England Medical Center Evidence Based Practice Center, a research affiliate of the Agency for Healthcare Research and Quality (AHRQ). He is an internationally recognized authority on clinical trial design, systematic reviews, metaanalysis and technology assessment and publishes regularly in major biomedical journals. He is an expert on communicating scientific knowledge to clinicians and in the processes by which physicians adopt new knowledge and technologies into clinical practice. Dr. Ogan Gurel, CEO of Duravest, Inc., remarked that “Dr. Bonis’ outstanding credentials, diverse background and specific expertise at the highest levels of clinical trial design, outcomes research and physician adoption dynamics represent a truly unique and powerful resource for both Duravest and its subsidiaries. We are absolutely delighted with the appointment of Dr. Bonis to our world-class medical advisory board.” According to Dr. Bonis, “I am delighted to join the medical advisory board in light of Duravest’s vision and dedication toward rapidly bringing safe and innovative technologies to the marketplace. The major lapses recently seen in the safety of drugs and medical devices have stunned the medical community. Patients and caregivers are increasingly placing a large premium on safety, and Duravest is well-positioned to meet this important trend.”
